

Whether you are a mom who cooks for many, a bachelor who cooks on rare occasions for himself or a new college student who for the first time has their own refrigerator – We have all opened the fridge said to ourselves, “What a waste of Money” from spoiled produce or leftovers that lost their zest....

Don't have your food singing

the blues before

their time.....

**“I was given the MiniMate to try, or, honestly,
I don't think I would have bought it!**

*But within a few minutes of using it in my refrigerator,
I noticed a big improvement in the odors—even with
baking soda.*

*This means all my produce and leftovers taste better.
After a few days, I also noticed that my fresh produce
was lasting longer.*

*You may know me for my Grammy-nominated albums
Blues with a Vengeance and All Odds Against Me, but
what you might not know is that I grew up on downhome
cooking and that all my life I have loved organic
foods. Because my wife and I try to eat almost all
organic foods, which are especially susceptible to
spoilage, I save a lot of money with the MiniMate.
I also found out that because of the MiniMate's activated
oxygen, which kills most germs, my food is safer, too.*

**I think you should try this product risk-free for 30 days.
I want you to try it BEFORE you buy it!**

*That's right: call right now and order
the MiniMate; just pay the \$6.95
handling fee. I think you will love it
too; in fact I'm betting on it!*

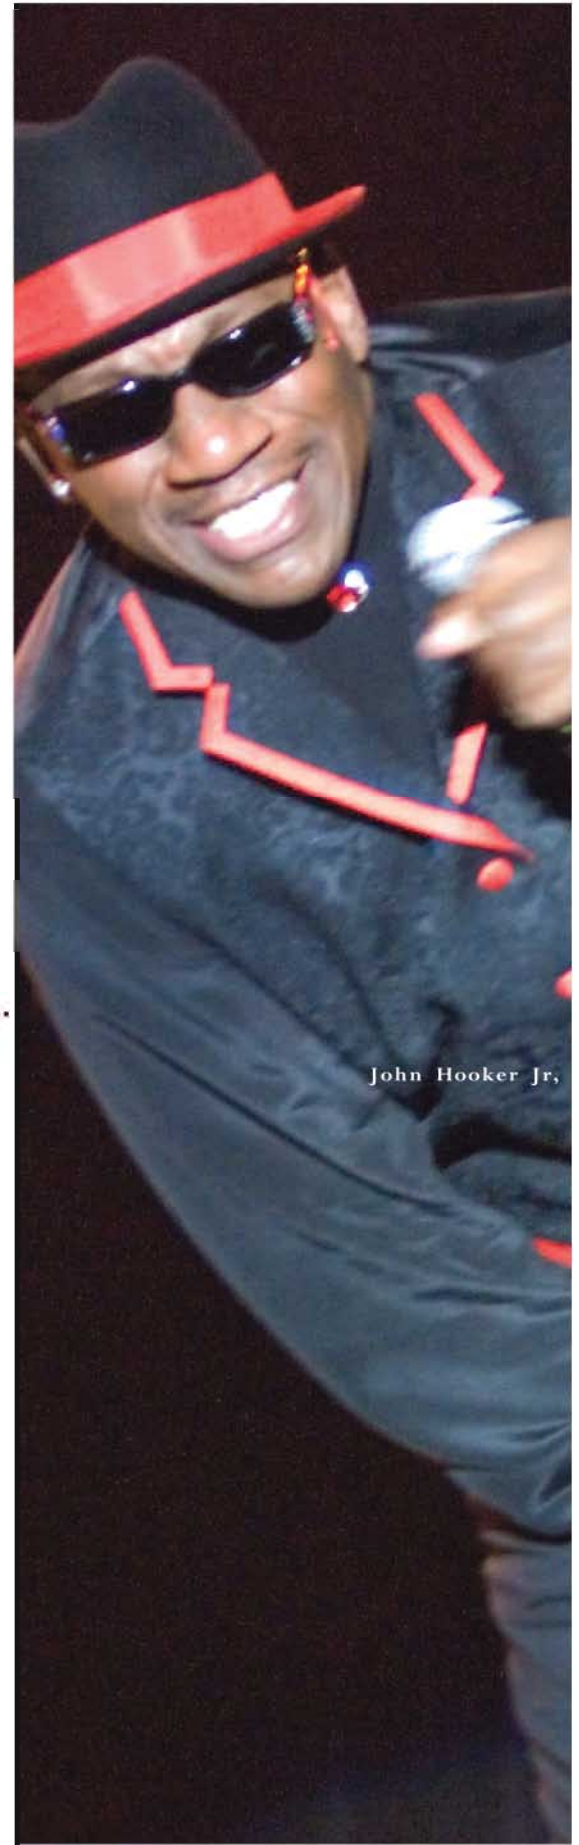

*Try it free for 30 days with a valid
credit card and pay only a \$6.95
handling fee. The price of \$29.95 is
billed to your credit card if not
returned within 30 days. I know you
will like it as much as we do!”*
